

Settings

Optimize Device Storage

Find duplicates in the phone and iPad. Remove original photos and save space by keeping the high-quality ones.

1. Find duplicate photos on mobile devices.
2. When execute is complete, delete the original photos and keep the compressed high-quality ones to free up storage.

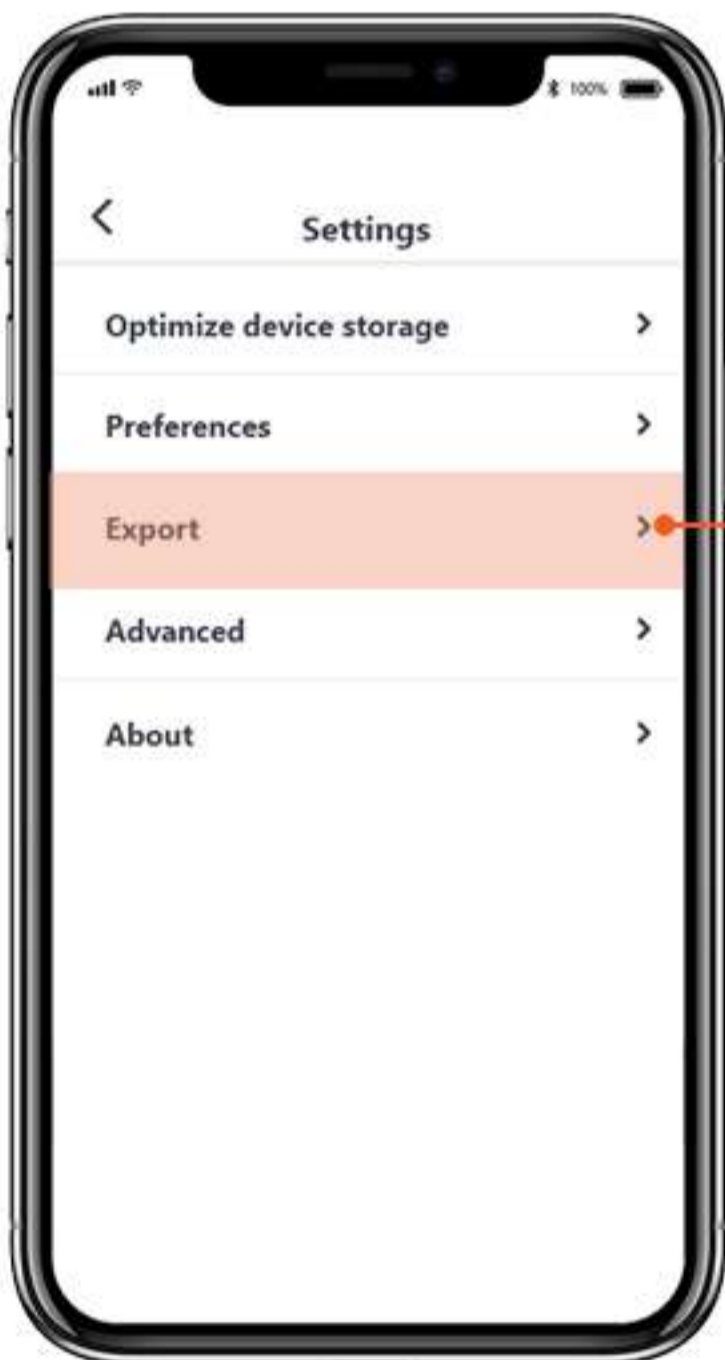

Settings

Preferences

Default settings:

- Receive notifications via Wi-Fi only.
- Receive notifications when other users add the new photos.
- No automatic backup notifications.

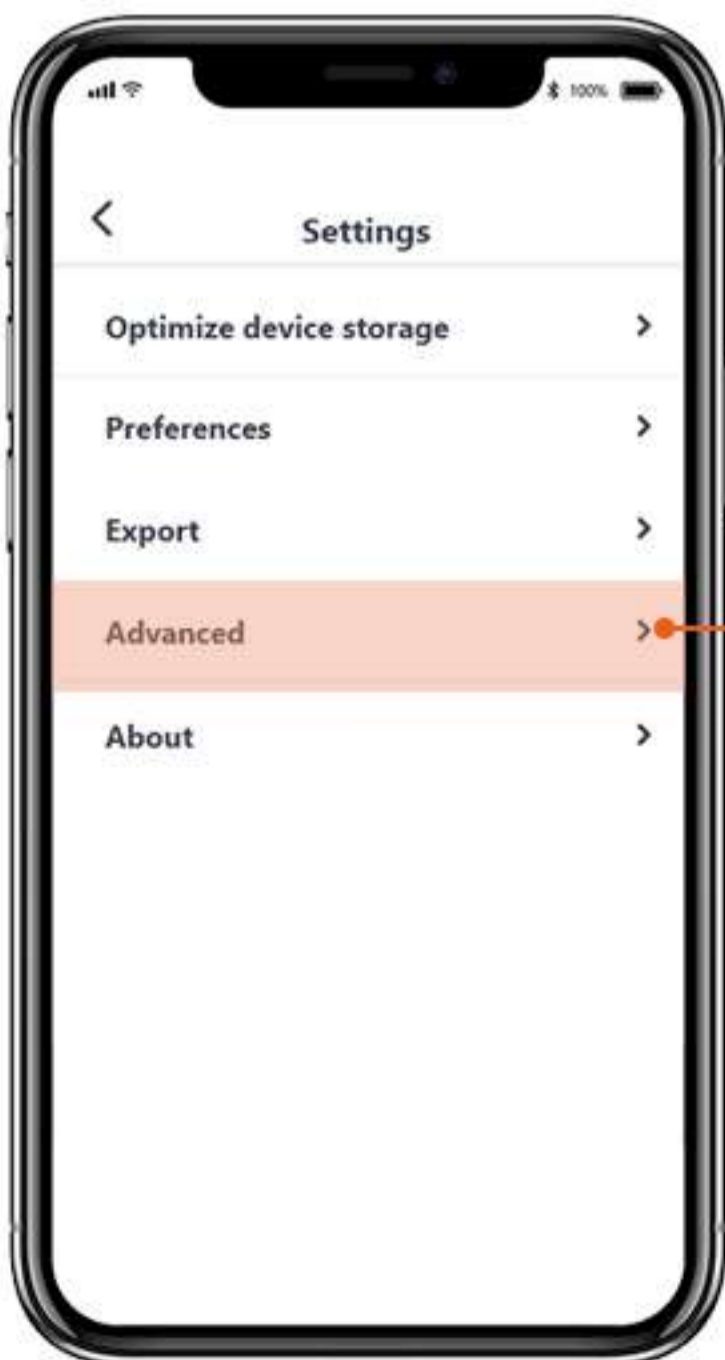

Settings

Export

Export Dynalink Photos files to external drives.

1. For offline backup, you are able to export your data files from both private and shared space into the external devices.
2. The system will compare the new files with those exported and will only export the new ones added.

Settings

Advanced

Admin only (the first register) :
